HYDRAULIC TWO PLATEN INJECTION MOLDING MACHINE

Production Locations

As a member of the ENGEL Group, WINTEC was established in China in 2014. We are committed to providing customers with high-performing, efficient, cost-effective injection molding machines and solutions. We shatter the impossible trio of quality, efficiency and cost, being your reliable partner for your successful international development.

ENGEL GROUP

We at WINTEC make proven innovations accessible and bring them straightforward, hassle-free and deliver you the streamlined injection molding solutions. Leveraging ENGEL's 80 years of engineering excellence and sharing its global sales and service network, we turn industry-leading performance into your tangible competitive edge.

After years of growth and continuous development of our portfolio, WINTEC brings you the smart path to your long-term success: Plug & Inject.

YOUR ADVANTAGES AT A GLANCE

HIGHER PRODUCTIVITY

The servo hydraulic two-platen t-win is focused on fast and high efficient production. Fast movements, short clamping force build-up time and synchronized locking device movement reduce total cycle time and increase productivity.

INCREASED AVAILABILITY

The reliable and proven design as well as features allow fast access for maintenance and increase machine availability and output.

HIGHER ENERGY EFFICIENCY

The servo drive system servowin guarantees fast acceleration and low energy consumption.

SMALLER FOOTPRINT

The two-platen machine concept allows a compact design for less space requirements.

SMARTER CONTROL UNIT

Future-oriented technologies with long-term availability and upgradability. Powerful extension functions for future challenges.

Smart Machine

Intuitive operation & one-touch operation

Future-oriented technologies

Self-explanatory navigation

Assistance systems

Ergonomic panel

Individually, tailored to the operator

Smart Functions

 <p>iQ weight control*</p> <p>Constant filling under changing conditions</p>	 <p>Mold parallelism measurement</p> <p>Mold parallelism measurement and clamping force optimization</p>	 <p>Mold protection*</p> <p>Precision monitoring during the whole injection molding process</p>
--	--	---

ecograph

Display of energy consumption for last and current cycle.

ecobalance*

Intercept of power peaks and uniform distribution of the total energy demand across the cycle.

Micrograph

Recording process parameters for quality control purposes that helps you analyze, optimize and monitor the process.

Autoprotect injection monitoring*

Self-learning system for highly sensitive mold protection during injection.

Program parameter limits*

Specifying the input range for up to 150 parameters individually to prevent setting of illogical or severely deviating.

e-help

Information on the most important functions and operations of a system directly at the machine.
